Office Action Summary	Application No. 09/989,301	Applicant(s) PUPUTTI, MATTI	
	Examiner SUMAIYA A. CHOWDHURY	Art Unit 2421	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/8/08 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 57-76 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
3. Claims 57-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler (6741288) in view of Levitan.

As for claims 57, 62, 67, and 72, Kessler discloses an apparatus, comprising:

A transmitter, wherein the transmitter is configured to:

Transmit a network information table (PSIP, MPEG), wherein the network information table contains a linkage to a control channel (An PSIP or and MPEG is transmitted which correlates PIDs to particular streams/services. The PSIP or MPEG are linked to control data. col. 1, lines 35-65, col. 5, lines 37-52); and

Transmit the control channel (control data), wherein the control channel contains access information corresponding to one or more services (The control data which contains access information corresponding to services is transmitted. Col. 6, lines 22-33, col. 8, lines 25-67).

However, Kessler fails to disclose wherein the services are internet protocol based services.

In an analogous art, Levitan discloses wherein the service is an Internet Protocol-based service – [0021] and [0023].

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Kessler and Bryant's invention to include the above mentioned limitation, as taught by Levitan, for the advantage of using the major standard that enables information exchange between computers.

As for claims 58, 63, 68, and 73, Kessler discloses wherein the access information comprises network address information (Col. 6, lines 22-33, col. 8, lines 25-67).

As for claims 59, 64, 69, and 74, Kessler discloses wherein the control channel is transmitted via a transport stream (Col. 6, lines 22-33, col. 8, lines 25-67).

As for claims 60, 65, 70, and 75, Kessler discloses wherein the control channel contains access information corresponding to one or more services of the transport stream (Col. 6, lines 22-33, col. 8, lines 25-67). Levitan discloses internet protocol based services ([0021] and [0023]).

As for claims 61, 66, 71, and 76, Kessler discloses wherein the control channel is transmitted via a program specific information layer of a transport stream (col. 1, lines 40-50, col. 5, lines 7-15).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SUMAIYA A. CHOWDHURY whose telephone number is (571)272-8567. The examiner can normally be reached on Mon-Fri, 9-5:00.
